superGRIP

Why *superGRIP*?

- high stability at light deadweight, therefore suitable for one-piece ramps with spring actuation
- additional working safety when driving on the vehicle and load securing due to higher friction factor
- economic due to long durability
- simple exchange of existing wooden flooring on almost all Goldhofer low-loaders due to nearly equal design height

Technical Specification:

- aluminium base frame with vulcanized special rubber padding
- available in panel size 2615 x 205 x 52 mm (l x w x h)
